

**Water Resources Program**  
**Statement of Intent for Pending Application**  
**for a Water Right Permit**

*To determine interest and/or option of pursuing an existing new water right  
Application in the Yakima Basin (WRIAs 37, 38 and 39)*

**Questions about this form should be directed to the Department of Ecology  
Central Regional Office (509) 575-2490**

**1. Application Number:**

WATER RIGHT APPLICATION NO. (i.e. 1234, G4-01234, etc.)

**G4-31945**

**2. Applicant Information:**

APPLICANT/BUSINESS NAME <i>Kameron Wyckoff</i>	PHONE NO. <i>509-965-4866</i>	PHONE NO.
MAILING ADDRESS <i>15029 Douglas Road</i>		
CITY <i>Yakima</i>	STATE <i>WA</i>	ZIP CODE <i>98908</i>
E-MAIL ADDRESS <i>fishbone501@hotmail.com</i>		

**3. Intent: Check the Appropriate Box: Choose ONLY one box.**

A. **Mitigate** - Providing a mitigation plan may allow Ecology to approve your application.

☐

**a. MITIGATE with PLAN:** I/we request that Ecology amend this application to include the attached mitigation plan and process the application at this time. I/we believe my mitigation plan offsets the adverse impacts to the state's water resources that would be caused by the new consumptive use identified in this application. I believe the proposed mitigation plan protects existing water rights by offsetting adverse flow impacts to the Yakima River and/or a more nearby tributary creek.

☐

**b. ON-HOLD:** I/we request that Ecology place this application On-Hold, while I/we pursue mitigation. A mitigation plan can be submitted at any time in the future to accompany this application. The application priority date will remain the same as a result of choosing this option.

**(Continued on reverse side →)**

B. **Process** - Please process my application.

☐ a. **PROCESS – NON-CONSUMPTIVE**: I/we request that Ecology process the application at this time. I/we believe the proposed project qualifies as a non-consumptive use. A non-consumptive water use does not diminish the source or impair existing water rights.

☐ b. **PROCESS – CONSUMPTIVE, WITHOUT MITIGATION**: I/we request that Ecology process this application in its current state. I/we hereby request that the application be evaluated for approval or denial, which is an appealable action.

C. **Assign** - I/we no longer own the place where water was intended to be used under the permit application.

☐ **ASSIGN**: I/we request to assign my/our interest in the permit application to another person. This requires filing of an application assignment form and fee (RCW 90.03.310). To download the assignment form go here:  
<http://www.ecy.wa.gov/biblio/ecy040161.html>

*If you choose to assign, please also check the appropriate box below.*

- ☐ Process the attached assignment form.  
☐ Mail me an assignment form.

D. **Withdraw** - Please withdraw my application.

☒ **WITHDRAW**: I am/we are no longer interested in pursuing the above application to appropriate public waters of the state. I/we understand that this withdrawal is voluntary and that this application will be removed from the list of pending applications.

4. **Signatures**: Attach additional signatures, if applicable.

*I certify that I am the holder or authorized representative of the above water right application.*

Re: Water Right Permit Application No. G4-31945

Dear Applicant:

The purpose of this letter is to inform you about options regarding your pending ground water right application No. G4-31945, filed with the Department of Ecology (Ecology) on 3/4/1994, located in the Yakima Basin, specifically the Moxee and/or Wide Hollow subbasin. We appreciate your patience with the water right permitting process. As a result of water shortages and legal challenges, water supplies in the Yakima Basin have been at risk and under litigation for years, and Ecology has not been able to issue new water right permits during that time. A comprehensive study has been recently completed that now allows us to move forward in the processing of water rights applications in your area.

The Yakima River Basin Surface Water Adjudication<sup>1</sup> (Adjudication) is entering its 35<sup>th</sup> year and moving toward completion. The Adjudication and other applicable state and federal Court decisions have clearly determined that water supply in the Yakima River Basin is over appropriated. In other words, the courts have said that more surface water rights have been confirmed in the Adjudication than there is water legally available to appropriate. This condition is more severe during low water years, when the basic tenet of Western Water Law is relevant – first in time, first in right. Those with surface water rights in the Yakima Basin with priority dates after May 10, 1905, have frequently been limited or curtailed during low water years.<sup>2</sup> The purpose of curtailment is to protect access to water for senior water right holders.

In September 2011, the United States Geological Survey (USGS) released the final report on the Yakima Basin Groundwater Study.<sup>3</sup> This 12-year study confirmed that groundwater and surface water are directly connected in the Yakima Basin.

**FILE COPY**

<sup>1</sup> *State of Washington, Department of Ecology v. James J. Acquavella, et al., Yakima Superior Court Cause No. 77-2-01484-5.* <http://www.ecy.wa.gov/programs/wr/rights/adjhome.html>

<sup>2</sup> The following years represent low water years since the Adjudication began in 1977; 1977, 1992, 1993, 1994, 2001, and 2005. These years are good indicators as to the frequency of junior surface water right holders having limited water supply or being curtailed in the recent past.

<sup>3</sup> "Numerical Simulation of Groundwater Flow for the Yakima River Basin Aquifer System, Washington," D.M. Ely, M.P. Bachmann and J.J. Vaccaro. USGS Scientific Investigations Report 2011-5155. <http://pubs.usgs.gov/sir/2011/5155/>

The study also demonstrates that pumping groundwater wells in the Moxee and Wide Hollow subbasins reduces streamflow and would add to the existing water deficit in the Yakima Basin.

Therefore, Ecology anticipates that it will be unable to approve any pending applications for new surface water or groundwater rights in these subbasins unless an applicant is able to mitigate for the expected impact of the new water use. This is because a formal permit decision would likely conclude that under state law: 1) water is not available for new appropriation, 2) a new appropriation would impair existing water rights, and 3) a new appropriation would not be in the public interest. (RCW 90.03.290)

The good news is the Yakima Basin Integrated Water Resources Management Plan<sup>4</sup> (Integrated Plan) is working to fill the Basin's existing deficit and may even provide some additional water supplies in the basin for future uses. Unfortunately, the Integrated Plan is a long-term solution and is not the short-term answer.

Based on our review of your application, we have determined that your water right application is junior to the critical date of May 10, 1905, and will likely have an impact on surface water in the Yakima Basin unless mitigated. Therefore, we ask that you consider, and subsequently choose one of the following options regarding your pending water right application on the enclosed Statement of Intent form.

#### Application Processing Options

- A. **Mitigate<sup>5</sup>** - In the case of your application, providing a mitigation plan that protects existing water rights by offsetting the flow impacts to the Yakima River and/or nearby tributary creeks may allow Ecology to approve your application that otherwise would likely be denied because it does not meet the legal requirements of water availability, impairment, or public interest. A mitigation plan should describe the effects of your proposed water use and present a proposal to alleviate those effects.
- a. **Mitigate with Plan.** By selecting this option, you choose to include a mitigation plan to support processing your application. The mitigation plan must offset the adverse impacts to the state's water resources that would be caused by the new consumptive use identified in your application, and must protect existing water rights by offsetting adverse flow impacts to either the Yakima River and/or a more nearby tributary creek.
  - b. **On-hold.** By selecting this option, you choose to place your application On-Hold, while you pursue mitigation. A mitigation plan can be submitted at any time in the future to accompany your application. You will not lose the priority date of your application as a result of selecting this option.

---

<sup>4</sup> The Integrated Plan identifies a comprehensive approach to develop water resources and ecosystem restoration improvements to address a variety of problems affecting fish passage, fish habitat, and water supplies for agriculture, municipalities, and domestic uses. <http://www.ecy.wa.gov/programs/wr/cwp/YBIP.html>

<sup>5</sup> "Mitigation" means measures that offset adverse effects on a water source to eliminate impairment to existing water rights and/or detriment to the public interest. See FAQ enclosure for more details.

- B. **Process** - You may request that your application continue to be processed to a formal decision without providing or seeking mitigation.
- a. **Process – Non-Consumptive.** By selecting this option, you request that your application be processed at this time because your project qualifies as a non-consumptive<sup>6</sup> use. A non-consumptive water use does not diminish the water source or impair existing water rights.
  - b. **Process – Consumptive, Without Mitigation.** By selecting this option, you request that your application be processed in its current state, though an approval is unlikely. Groundwater and surface water are not available for further consumptive appropriation in the subbasin where your application is pending. Exercising this option requires Ecology to make a formal decision on your application that is appealable pursuant to RCW 43.21B.310.
- C. **Assign** – If you are no longer the current owner of the place where the permit application was intended to be used, selecting this option requests that your interest in the permit application be assigned to another person. This requires an assignment form and fee be filed with Ecology for the application (RCW 90.03.310). Assignment forms are available at <http://www.ecy.wa.gov/biblio/ecy040161.html>.
- D. **Withdraw** - If you are no longer interested in pursuing your application to appropriate public waters of the state, selecting this option will withdraw your application and remove it from the list of pending applications. Withdrawal is voluntary.

This letter and the enclosed Statement of Intent Form have been sent to determine the next steps regarding No. G4-31945. This letter is not an Administrative Order issued by Ecology pursuant to RCW 43.27A.190, nor is issuance of this letter an appealable action pursuant to RCW 43.21B.310.

Please reply within ninety (90) days of the date of this letter by choosing one option on the enclosed Statement of Intent Form and mailing it back to Ecology using the enclosed postage-paid envelope.

**If you do not respond within ninety (90) days of the date of this letter or do not return the enclosed form, Ecology will process the application in its current state. An approval is unlikely; a formal decision is likely to result in a denial of the application based on groundwater and surface water not being available for further consumptive appropriation in the subbasin where your application is pending. A formal decision will result in an appealable action pursuant to RCW 43.21B.310.**

STATE OF WASHINGTON  
DEPARTMENT OF ECOLOGY

15 West Yakima, Suite 200 • Yakima, Washington 98902-3452 • (509) 575-2490

August 11, 1999

Dear Ground Water Applicant:

Re: Ground Water Study

In the next few days you will hear about a new study that the Department of Ecology (Ecology) will be undertaking together with the U.S. Bureau of Reclamation (USBR) and the Yakama Nation. The ground water study will be led by the U.S. Geological Survey (USGS), which has been involved in many aquifer studies both in Central and Eastern Washington.

Ecology, the USBR and the Yakama Nation recognize that additional scientific data is needed to make sound water management decisions in the Yakima River Basin, including new ground water permit decisions. While much of the Yakima Basin's surface water is appropriated, and is under adjudication, just how much, when and where ground water withdrawals impact surface water supplies is not well understood.

We are launching this study to learn more about the relationship between ground water and surface water supplies, and to establish a set of common principles for managing water resources, including ground water.

Until the study is complete, the three parties have agreed to conservatively manage water resources in the basin.

Within the next 120 days, the Department of Ecology will propose a rule that would curtail or limit new ground water withdrawals until study results are available. The rule-making process is a public process and there will be workshops and hearings to inform water users in the valley of the reasons for the withdrawal and how it would work. Transfers of, or changes to, existing ground water rights would still be processed as resources at Ecology or local conservancy boards allow.

Ecology looks forward to your questions, comments, and participation in the upcoming process. If you have any questions please contact Carol Mortensen, Water Resources Customer Assistance, at (509) 575-2597. Please see enclosures for more information.

Sincerely,

Robert F. Barwin, Section Manager

Re: Ground Water Application No. G4-31945

We have received your application for appropriation of water and it has been assigned the above number. Please refer to it by number in future correspondence.

Please complete the following two steps:

1. Enclosed is a notice of your application which must be published once a week for two consecutive weeks in a newspaper published in Yakima County. The newspaper should have general circulation in the locality where the water is to be diverted and used, and must be qualified as a legal newspaper. Publishing the notice in a remote part of the county, when not necessary, may be cause for you to be required to republish the notice in a designated newspaper.

Publication should start within 30 days from the date of this letter.

To assure accuracy, it is your responsibility to check the notice carefully before having it published. If an error is detected, please contact this office for correction and/or resolution. The actual date of the second printing must appear in both publications.

2. After publication, the publishing newspaper should provide you with a notarized original Affidavit of Publication which should be forwarded to our office as soon as possible.

Sincerely,

Water Resources Program  
Central Regional Office

NOTICE OF APPLICATION TO APPROPRIATE PUBLIC WATERS

TAKE NOTICE:

That KAMERON T. WYCKOFF  
of Yakima, Washington on March 4, 1994 under  
Application No. G4-31945 filed for permit to appropriate public waters, subject to existing rights,  
from a well  
in the amount of 27 gallons per minute  
each year, for continuous single domestic supply, irrigation during irrigation season,  
stockwater

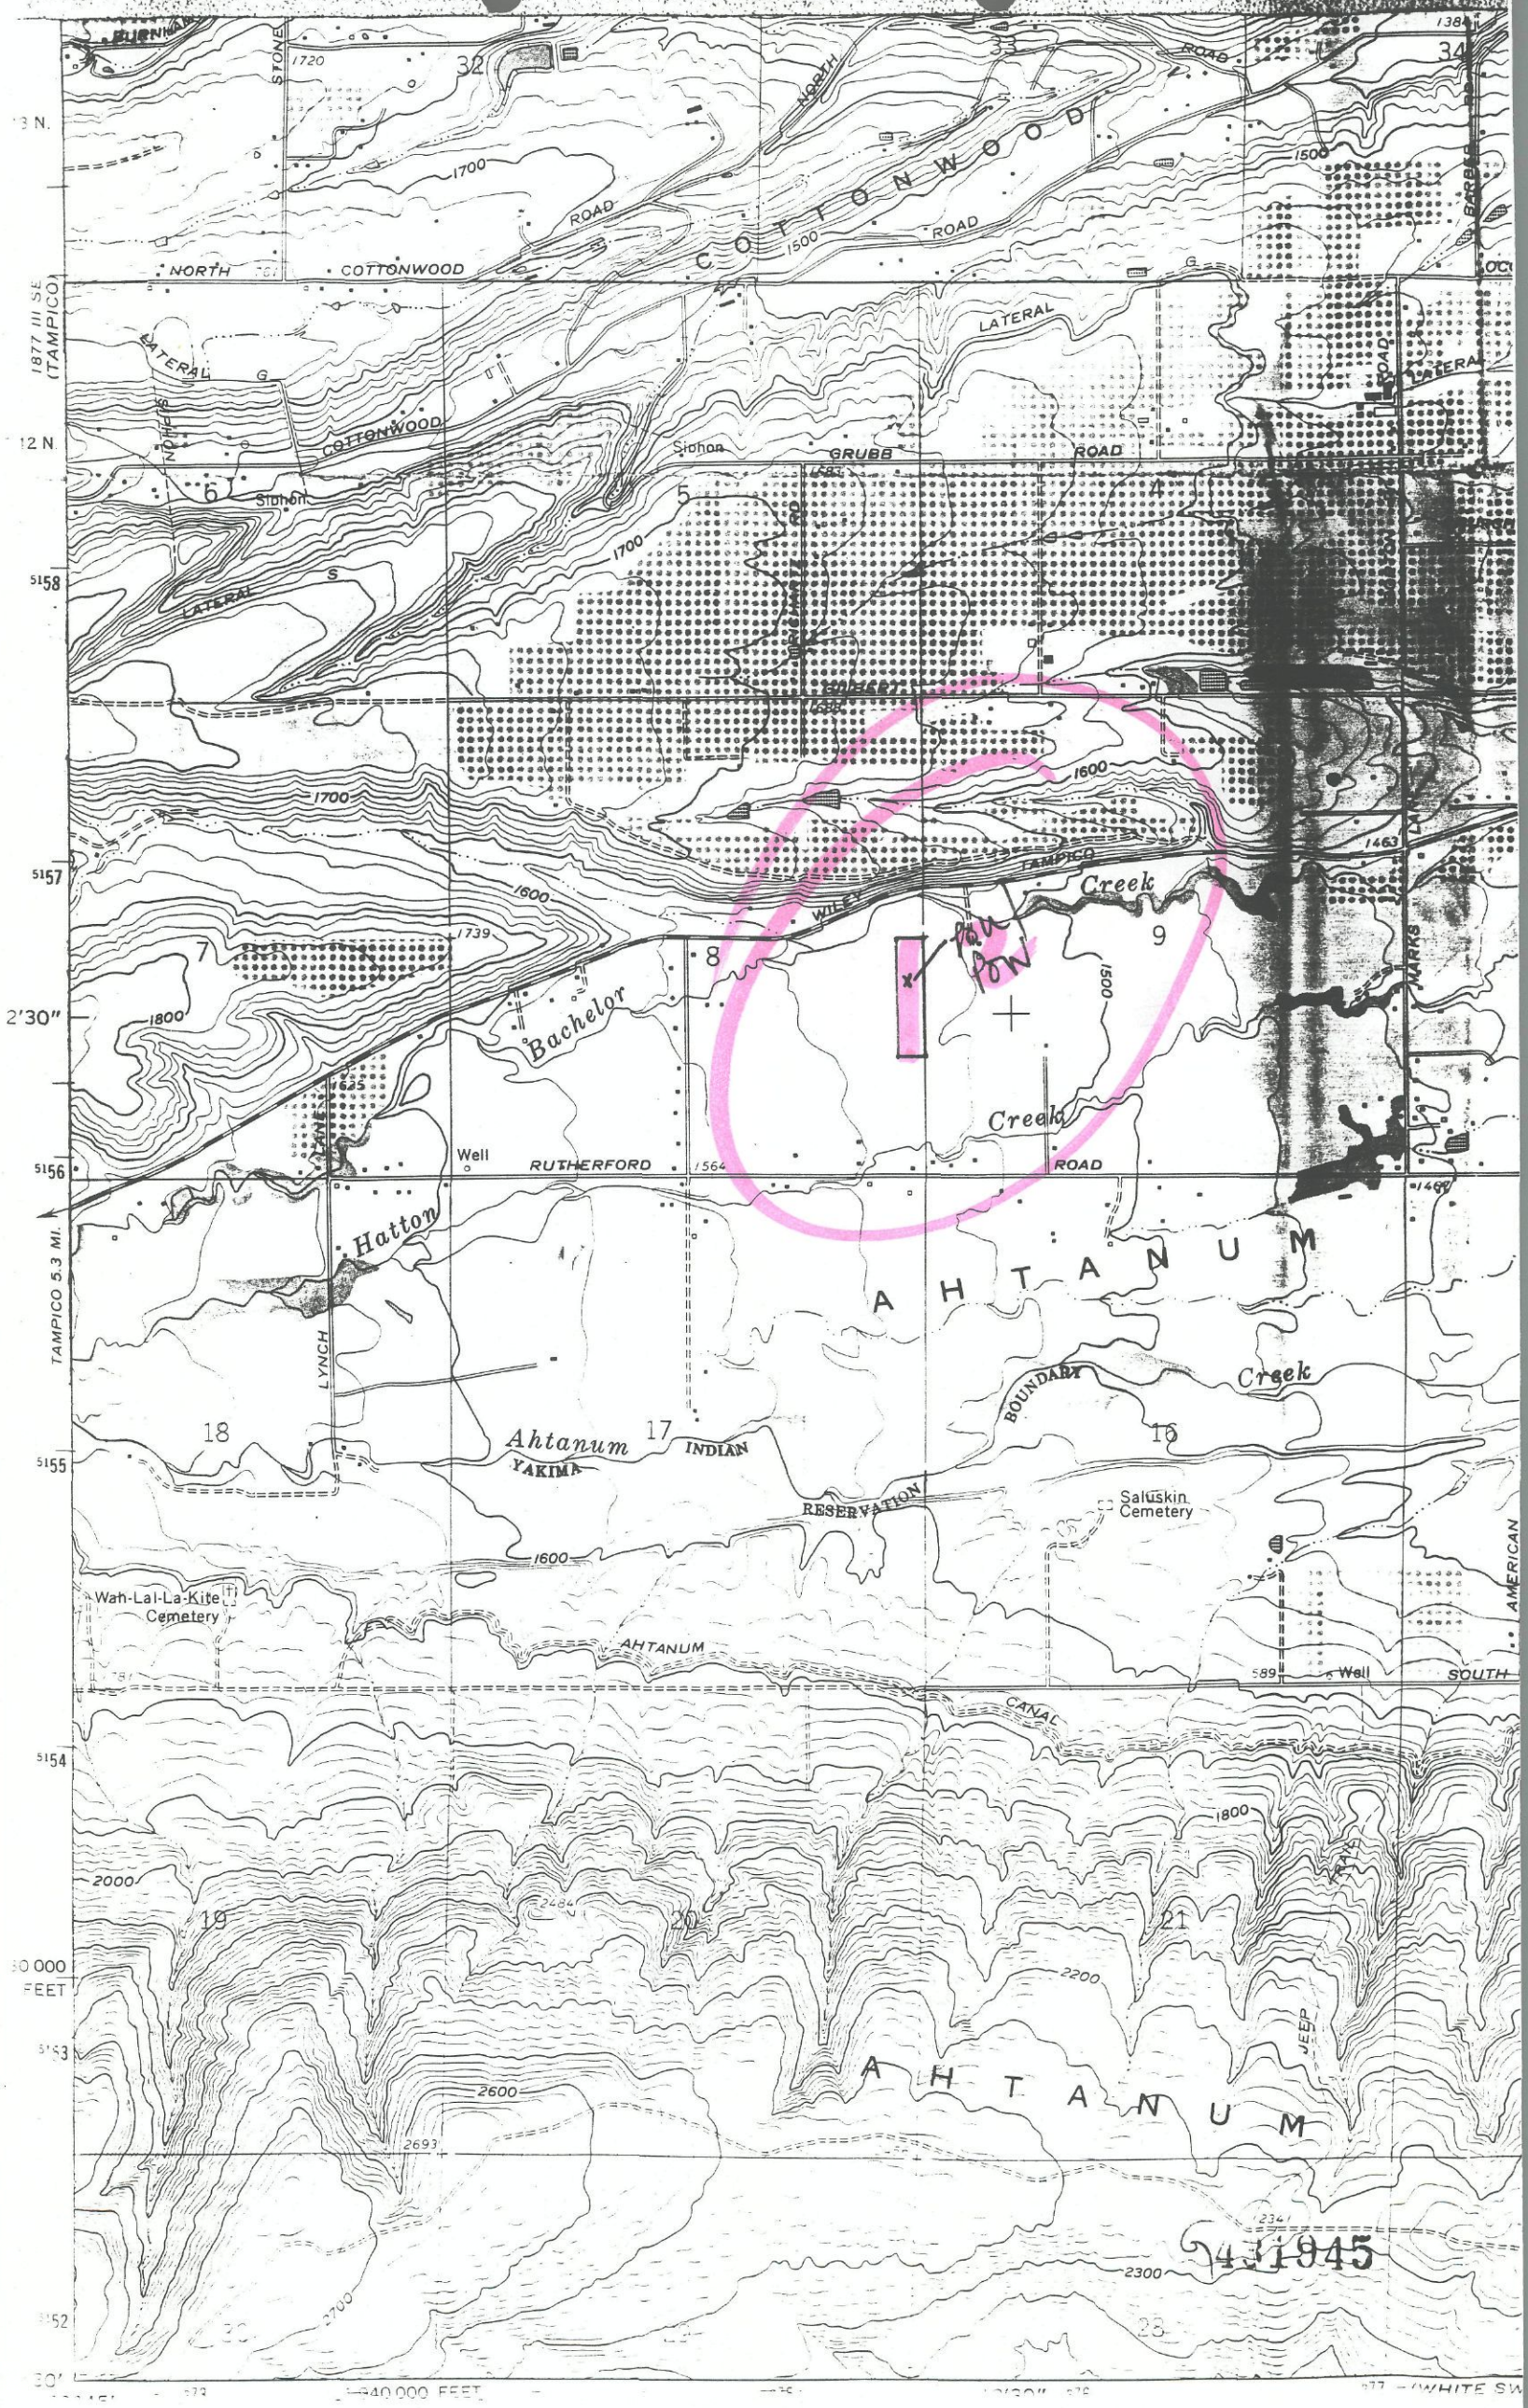

The source of the proposed appropriation is located within NE<sup>1</sup>/<sub>4</sub> SE<sup>1</sup>/<sub>4</sub>  
of Section 8, Township 12 N., Range 17 E. W.M., in Yakima County.

*Protests or objections to approval of this application must include a detailed statement of the basis for objections; protests must be accompanied by a two dollar (\$2.00) recording fee and filed with the Department of Ecology, at the address shown below, within thirty (30) days from*

*(Last date of publication to be entered above by publisher)*
